- Pedal Instead
- Students for a Sustainable Campus
- University Area Enrichment Association
- Save the Buckeye coalition

ABOUT SAVE THE BUCKEYE:

*Can you imagine the Buckeye State without the Ohio buckeye? Strange, but true: global warming is pushing the growing range for our beloved buckeye and other trees north. Left unchecked, global warming could make the buckeye rare in Ohio and common in northern states such as **Michigan (!)**. Find out what you can do to Save the Buckeye and learn about future events at www.savethebuckeye.org.*
